Subject: RE: Abreu subpoena PRIVILEGED AND CONFIDENTIAL ATTORNEY-CLIENT COMMUNICATION

Hi Natalie:

RE other lab activities beyond testing for forensic drugs. Basically, our primary function is to perform public health lab testing, for things like foodborne disease pathogens (salmonella, E coli, etc), sexually transmitted diseases, HIV, hepatitis, tuberculosis, vaccine preventable diseases like whooping cough, measles, mumps, bioterrorism agents like anthrax and plague, childhood lead screening, environmental chemistry of public health relevance like arsenic, mercury, cyanide, chemical terrorism agents like mustard gas, mosquito-transmitted diseases like Eastern equine encephalitis and West Nile virus, rabies, and more!

Let me know please if you have any questions. I'll be checking emails this evening and will be back in the office tomorrow.

Thanks,
Linda

Subject: [REDACTED] subpoena PRIVILEGED AND CONFIDENTIAL ATTORNEY-CLIENT COMMUNICATION

Hi Linda,

I'm preparing the motion to quash and I'm hoping you can give me some information about the lab:

1. Were the same evidence protocols that were in place in June 2011 also in place in September 2005? If not, what was different (e.g., different computer system, no computerized scanning, etc.)
2. What does the laboratory do besides test drugs for the police?
3. What were Annie Dookhan and Elizabeth O'Brien's titles in September 2005?
4. What is Ms. O'Brien's current title?

Thanks,
Natalie
